

cydui::components::  
Component::create

cydui::components::  
Component::create\_for

cydui::components::  
Component::get\_init  
\_function

```
graph LR; A[cydui::components::Component::create] --> C[cydui::components::Component::get_init_function]; B[cydui::components::Component::create_for] --> C;
```

The diagram illustrates a relationship between three functions. On the left, two white boxes with black borders contain the function names 'cydui::components::Component::create' and 'cydui::components::Component::create\_for'. On the right, a gray box with a black border contains the function name 'cydui::components::Component::get\_init\_function'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'create' and 'create\_for' functions utilize or depend on the 'get\_init\_function'.
