

```
cydui::layout::Layout  
::recompute_dimensions
```

```
graph LR; A["cydui::layout::Layout  
::recompute_dimensions"] --> B["compute_dimensions"]; B --> B;
```

The diagram illustrates a function call. On the left, a white rectangular box with a black border contains the text `cydui::layout::Layout` followed by `::recompute_dimensions` on a new line. A straight blue arrow points from the right side of this box to the left side of a second box. The second box, on the right, is gray with a black border and contains the text `compute_dimensions`. A curved blue arrow originates from the top right corner of the gray box and points back to its top left corner, indicating a self-call or a loop.

```
compute_dimensions
```
