

color_to_xcolor

color_to_xftcolor

cydvi::graphics::color
::Color::to_id

```
graph LR; A[color_to_xcolor] --> C[cydvi::graphics::color::Color::to_id]; B[color_to_xftcolor] --> C;
```

The diagram illustrates a mapping or dependency. On the left, two white rectangular boxes with black borders contain the text 'color_to_xcolor' and 'color_to_xftcolor'. On the right, a larger grey rectangular box with a black border contains the text 'cydvi::graphics::color' followed by '::Color::to_id' on a new line. Two blue arrows originate from the right side of the left boxes and point towards the left side of the grey box, indicating that both 'color_to_xcolor' and 'color_to_xftcolor' are associated with or point to the 'cydvi::graphics::color::Color::to_id' entity.
